

# SAMPLE DASHBOARDS (BUILT ON POWERBI & EXCEL)

## 1. HOTEL TEMBO

The dataset was cleaned and analyzed on PostgreSQL and the dashboard built in Power Bi. The purpose of this project was to provide the hotel with a structured database for data management, since tracking of revenue was difficult due to poor record keeping.

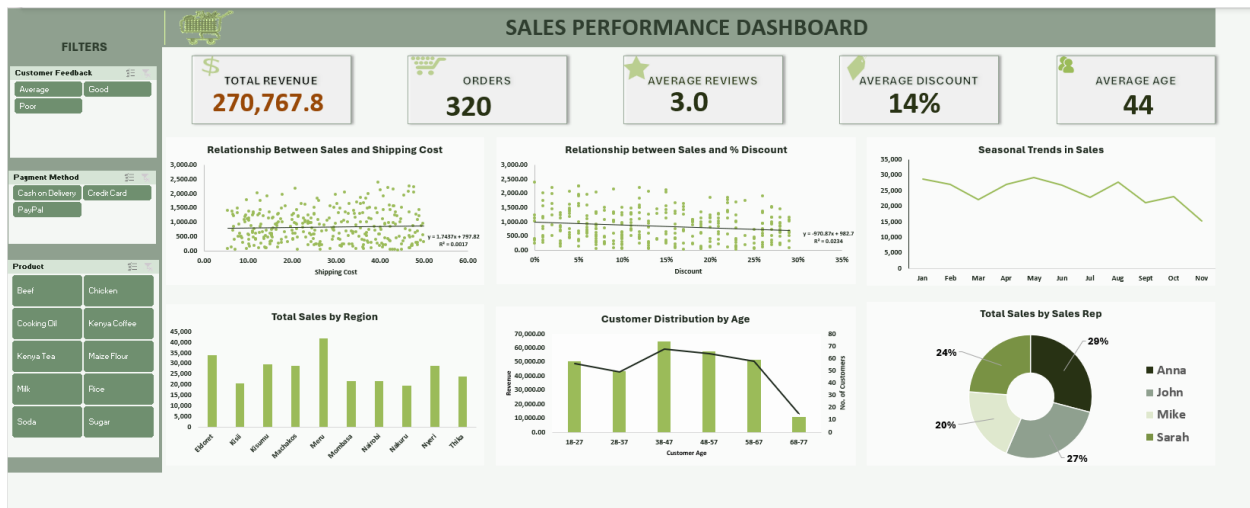

## 2. RETAIL STORE

The dataset was cleaned in Excel and the analysis was done in Power BI. The aim of the analysis was to identify key sales patterns and drivers, to inform marketing strategies for profit optimization for the store.

# SAMPLE DASHBOARDS (BUILT ON POWERBI & EXCEL)

## 3. FOOD BASKET

*This dataset was cleaned and analyzed on Excel. The purpose of the analysis was to evaluate the store's overall sales performance by identifying the primary drivers of revenue across regions, sales representatives, and suppliers.*
